

OUR JOURNEY OF INTERNATIONAL DIMENSION IN SCHOOL (IDS)

CLASS V-VI

ACTIVITY 3 & 4: Exploring the Traditional Game and Writing Report Participating

Class(es): VI

Under IDS activity, an interactive session of learning and exploring traditional games was conducted online for students of Class VI. Students not only learnt about how these games were played but also were acquainted with the names by which they were known. They were specially demonstrated about the Four-Square Game, that is a traditional game of the USA. Students had a hands-on experience of the game. Post the game, student reporters had great time writing a report on the Four-Square Game they played. They reported about the benefits of the game and how such games not only boost one's immunity and improve fitness but also enhance social skills, build team spirit, and lower the risk of many diseases.
