Dear Parent,

Greetings from the Principal's Desk !!

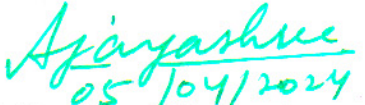

We are thrilled to share some exciting updates at our school aimed at enriching academic program and supporting the holistic development of our students. In our quest to continually offer an education that prepares our students not just academically but also for their future careers, we're introducing new chapters of learning across all grades. This includes specialized preparatory classes for Olympiads and various competitions for students from Classes I to X, starting this Saturday. These classes are crafted to provide targeted academic support, fostering a deeper understanding of subjects and enhancing problem-solving skills.

For our senior students in Classes XI & XII, we're rolling out Advanced Academic Excellence Classes. These are designed for those aspiring to excel in competitive exams like JEE, NEET, CUET, and more, offering rigorous training and comprehensive guidance to navigate these challenging tests successfully.

To ensure each student receives personalized attention and benefits fully from these programs, we will be dividing students into groups based on their academic goals and needs. The specifics of these groups, along with a separate timetable tailored to accommodate these new classes without disrupting the regular school day, will be communicated to students directly in class.

We believe these enhancements to our academic offerings will pave the way for greater success and personal growth for our students. We encourage you to discuss these new opportunities with your child and reach out to us with any questions, suggestions or for further details. Your support and engagement are key to making these initiatives a success.

Warm regards,

05/04/2024

(Ajayshree Sharma)
